14th February 2011

Dear Tim,

RE: APPROVED RESTORATION SCHEME PILKINGTON QUARRY
Further to our meeting on 7th February 2011 we write to confirm that our client
(Armstrongs Aggregates Ltd.) have ceased extraction of stone from the existing Pilkington
Quarry (Planning Permission references: - 50252/97 & 61530/02) and intend to implement
restoration under the timescale as set out in the approved restoration scheme documentation
as recorded in the planning register.

We would be grateful if, as was agreed at the meeting, you would confirm in writing that
commencement of restoration to achieve the approved final contours as shown on Plan
REST 1 is now required. You should be aware that we are working toward gathering all
the appropriate data to obtain any necessary permit/s for the importation of suitable inert
restoration material and our client has already incurred considerable expenditure in this
respect.

Yours sincerely,
for THE MINERAL PLANNING GROUP

MARTIN MILLMORE
Cc: BJ and DA

1 There may be a need to carry out some scaling work as restoration progresses, following advice from our Geotechnical consultant.
